

Panel System

The ultimate garage makeover with panels installed on walls with flexible storage accessories options available.

Why choose our Panel System?

We offer the option to have one wall or all the walls in your garage fitted out with our panel so you can create a space that's right for you.

Our Panel System gives you the flexibility to do as little or as much as you want. Plus you can add the storage accessories that are right for your lifestyle.

We have helped over 2000 customers right across South Africa to turn their garage into a welcoming entrance to the house, a great storage room (and for the car!) or even a home gym. You can even add in floor tiles to create a streamlined look.

Benefits

So what exactly are the benefits of having this system installed?

- We can cover up any pipes so the space looks streamlined and organised
- Covers the entire wall and hides any marks or unsightly areas
- Flexibility is key and once installed on the wall, all storage accessories are easily moved to a new location
- Build it up over time: Feel free to install and then buy accessories from our e-store as and when you need them
- Using panel on your walls allows you to optimise the space and make the most of every square inch of wall space
- Create a brighter space: white panels help bounce the light around the garage

What is the installation process?

Depending on where you live, we can either send someone over to visit your garage or we can quote remotely.

We come to see you

One of our team will visit you to take a look at your garage. They will take photos and note dimensions. They will also speak with you about exactly what your needs are so they can go away and prepare drawings and a quote ideal for your bespoke space. We will then email you through the quote.

Remote quote

If you live a little further away, you can send in photos and dimensions of your garage plus a little information on what you are looking for. We can then prepare the drawings and quote for you remotely and send it to you via email.

Next steps

Once you decide to go ahead with your installation the date is confirmed, usually within two weeks but it may be up to 5-6 weeks during busy periods.

What happens during installation?

We will ask you to empty the garage before our arrival and then our installation team will get to work. A standard double garage will take approximately 1-2 days

The team will attach timber battens to the current wall for support and strength. The panel is then screwed into these to attach it to your wall and finished off with aluminium trim.

Choosing accessories

Part of the process is working out what kind of storage accessories you will need.

We offer a huge variety of options which include shelves, baskets, bike hooks, surf board storage, hook packs, ladder hooks, workbenches, garden storage, kayak storage, golf racks, tip out bins, tool racks and shoe shelves,

Choose these as part of your initial installation or give us a call to purchase after work is completed.

More detail on accessories can be found on the next page.
